

TELMAR NETWORK TECHNOLOGY TMA AND LMU REPAIR

Reduce Network Operating Costs with Telmar's Repair Solution

Telmar Network Technology offers wireless repair solutions for 2G and 3G networks (CDMA 1x, EvDO, GSM, EDGE and UMTS). When you choose Telmar for your repair services, you will benefit in many ways including:

- One-year warranty on all repairs
- 15-day turnaround
- Re-return rate 30% better than the industry standard (TL 9000)
- Simplified return process

Don't Restart the ROI Clock by Replacing Failing Tower Mounted Amplifiers

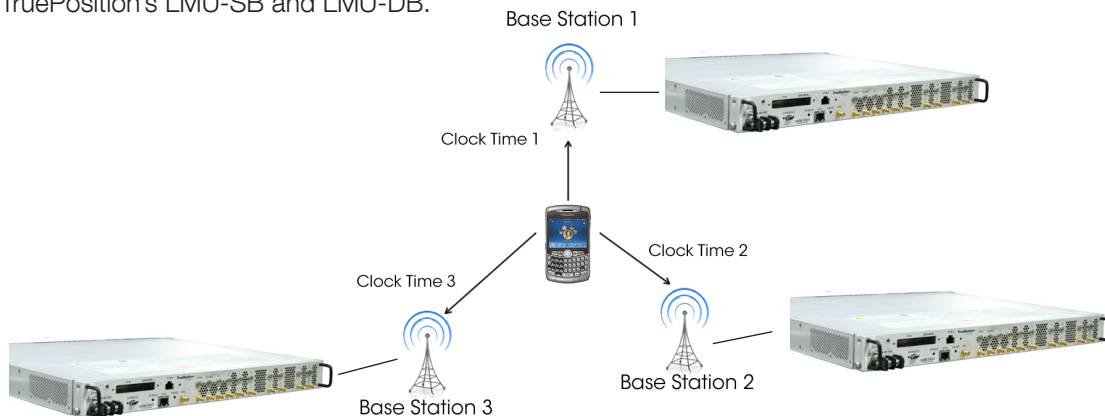

Tower mounted amplifiers (TMAs) ensure strong uplink communications, increase site capacity and improve return on investment on cell site deployments. The payback time on TMAs is between two and 12 months, however, when a TMA is out of warranty and fails, it is often replaced with a new unit starting the return on investment clock again. With Telmar's repair solution, your TMA can be redeployed for years of reliable service at a mere fraction of the cost.

Our repair capabilities include a wide range of TMAs in any frequency from leading manufacturers including Ericsson, RFS, Andrew and Powerwave.

Maintain E911 Requirements All the Time

Since 2006, Telmar has helped service providers meet the rigorous E911 requirements, while reducing network operating costs with TruePosition LMU repair. Our LMU repair service helps reduce inventory requirements and shorten turnaround time.

Telmar's repair program includes TruePosition's LMU-SB and LMU-DB.
