

TELMAR NETWORK TECHNOLOGY MULTI-VENDOR, NETWORK-WIDE REPAIR

SINGLE SOURCE MULTI-VENDOR NETWORK-WIDE REPAIR

Telmar Network Technology is the single source solution for your multi-vendor network maintenance needs including repair and test. Our comprehensive service allows our customers to have one partner for all of their repair service by delivering multi-vendor, multi-system repair for a comprehensive portfolio of over 70,000 parts (wireless, data, optical transmission, PCB, wireline, enterprise and test equipment) used network wide. Our customers – from service providers to OEMs and enterprises—can save money, and can speed up the repair turnaround time by having one partner they can rely on for all of their repair needs. Telmar's single-source solution includes repair of a wide range of equipment including but not limited to:

WIRELESS	2G (GSM, CDMA), 2.5G (EDGE, GPRS, 1xRTT), 3G (UMTS, EVDO) 4G (LTE, WiMAX), Switches, Microwave, Power, Tower Mounted Amplifiers (TMA), LMU, GSM Cell Boosters
DATA	Blade Server, Access Server, CSU/DSU, Gateways, IP Switches, Routers
OPTICAL	SONET/SDH, Optical LAN, ROADM, DWDM, Digital Cross Connects (DCS), Optical Cross Connects (OCX)
WIRESLINE	Access, Transport, Digital Loop Carrier (DLC), ISDN
PCD	BGA, BGA and SMT Pad, Complex Circuit Board Assemblies
ENTERPRISE	WLAN, VoIP, Phones, Servers, DSL/Cable Modems, Set Top Boxes
TEST SET	Butt-In Test Sets, Multimeters and Voltmeters, Cable Fault Locators, Throwmasters, Faultmasters

TELMAR NETWORK TECHNOLOGY MULTI-VENDOR, NETWORK-WIDE REPAIR

WHAT SETS TELMAR APART

What sets Telmar apart from our competitors when it comes to multi-vendor repair? Quality of work. Faster turnaround time. Easy to use tools and processes. Industry-leading prices. Flexibility to add new services. Comprehensive data collection. Not only does that set us apart, but helps our customers offer the quality of service that their end users need.

QUALITY

*All repair facilities are TL 9000 and ISO 9001:2008
Repair return rates are among the best in the industry (QuEST Forum repair)*

TURN AROUND TIME

*Industry-leading TAT driven by rapid internal processing
Significant improvement over current MOP with regional locations*

EASE OF USE

*One-stop multi-vendor repair for all PCDs requiring repair · No RMA required for equipment return
Web access for repair status · Monthly status and statistical reports to ensure optimal program performance · Industry-leading Spare Parts Management programs*

VALUE AND PRICE LEADERSHIP

*Telmar volume allows industry-leading price points
Flexibility to provide options for the capitalization of repair costs*

FLEXIBILITY TO ADD NEW PRODUCTS

*State-of-the-art research and development capability
Strong OEM relationships to manage repair on all products*

COMPREHENSIVE DATA COLLECTION SYSTEMS

*Quality data collected · Re-return rate monitoring
No Fault Found (NFF) screening · Failure analysis*

MANAGING NETWORK STABILITY AND QoS

Telmar understands how critical it is to keep networks operating without interruption or without the loss of quality of service. As part of our Network Maintenance our industry-leading turnaround time of repairs and transportation helps minimize spare inventory requirements. Our spare parts management solutions includes depot-based sparing through remote depots established worldwide to support customer delivery requirements.

If customers need their repairs faster, we offer one-day advance replacement through our Certified Pre-Owned inventory. Swapping can also improve turnaround time and helps to expand margins.
