

TELMAR NETWORK TECHNOLOGY WIRELESS MULTI-VENDOR REPAIR

In today's economy, carriers are looking for ways to preserve and extend the life of their network. With Telmar Network Technology as your multi-vendor repair partner, not only can you extend the life of your communications network, you'll also achieve significant OPEX and CAPEX savings.

Telmar Network Technology is the market leader in delivering multi-vendor, network-wide repair to global service providers, OEMs and enterprises around the world. Our diverse portfolio of repair capabilities includes more than 70,000 parts of Wireless, Wireline, Enterprise, Customer Premise Equipment (CPE) and test equipment. Not only will you be able to speed up your repair turnaround time, you'll also be able to save money and time by having one repair partner for your multi-vendor repair needs.

Our multi-vendor repair solutions help shorten the turnaround time because we understand how critical it is to keep your network operating and servicing your customers. While an OEM will normally turn around standard repairs in 45 days, Telmar's standard repair solution is completed within 15 days or less.

GLOBAL MULTI-VENDOR WIRELESS REPAIR

Telmar Network Technology and its subsidiary, Commnet Supply, offer a full range of products and services to wireless carriers including multi-vendor, network-wide repair for 2G (GSM, CDMA), 2.5G (EDGE, GPRS, 1xRTT), 3G (UMTS, EVDO) and 4G (LTE, WiMAX) networks across North America, Central America and Latin America.

All multi-vendor repairs for access, switching and transport gear come with a one-year warranty. Wireless network equipment repair done at our world-class repair facilities includes:
